V1.4.0 — 12+ ADAPTERS

Data Bridge

Connect Everything.

Unify access control, alarm panels, industrial sensors, and IoT devices with your video management system. One bridge. Zero data loss. Real-time.

The Challenge

Siloed Security Systems
Access control events trapped in proprietary software — LenelS2, ZKTeco, Hikvision, Dahua all speaking different languages.

Delayed Response
When an alarm triggers, operators scramble to find video. No automatic correlation between alarm panels and cameras.

No Standard Integration
OpenAccess, ISAPI, CGI, SIA DC-09, ONVIF — every system needs custom code. Expensive and fragile.

Lost Events
Network glitches cause data loss. No retry, no queue, no audit trail. Events simply disappear.

The Solution

01
Universal Adapter Layer
12 pre-built adapters: LenelS2, ZKTeco, Hikvision, Dahua, SIP Direct Intercoms, SQL Database (ODBC), Modbus, BACnet, MQTT, and more.

02
Intelligent Pipeline
SQLite-backed persistent queue with regex filtering, priority rules, and field transformation. Zero data loss.

03
Multi-VMS Fan-Out
Simultaneously deliver to Nx Witness, Wisenet WAVE, DW Spectrum, Nx Go, and MQTT brokers.

System Architecture

- LenelS2 OnGuard
- ZKTeco BioTime
- Hikvision ISAPI
- Dahua ASI Series
- SIA DC-09 Panels
- SIP Intercoms
- SQL Database (ODBC)
- Modbus · BACnet · OPC
- MQTT Subscriber

Data Bridge
Queue · Filter · Transform

- Nx Witness VMS
- Wisenet WAVE
- DW Spectrum
- Nx Go
- MQTT Brokers
- Home Assistant
- Node-RED
- SCADA / IoT

How It Works

Collect — Poll ACS or receive alarms and events

Queue — Persist in SQLite for zero-loss

Process — Apply filter rules, transform

Deliver — Fan-out to all VMS & MQTT

Monitor — Dashboard, WebSocket, metrics

Use Cases

Enterprise Security
LenelS2 and Hikvision events on VMS timeline with instant camera recall across campuses.

Industrial & SCADA
Modbus, BACnet, OPC UA sensors trigger video bookmarks for faults and safety events.

Intercom & Telephony
SIP Direct intercoms (2N, Grandstream, Doorbird) with automatic video correlation on door events.

Smart Building & IoT
MQTT output to Home Assistant, Node-RED. ONVIF events from 470+ manufacturers.

VMS Integration

Nx Witness	Wisenet WAVE	DW Spectrum	Nx Go
Network Optix flagship open VMS platform	Hanwha Vision enterprise video management	Digital Watchdog IPVMS platform	Cloud-first mobile VMS solution

Powerful Features

High Availability

Active/Standby failover with automatic heartbeat monitoring and priority selection. Seamless redundancy.

- Model **Active/Standby**
- Failover **Automatic**
- Monitoring **Heartbeat**
- Licensed **Yes**

SIP Direct (Intercoms)

Direct SIP integration with 2N, Grandstream, Doorbird, Aiphone. Door events, card swipes, tamper alerts via SUBSCRIBE/NOTIFY.

- Port **UDP 5060**
- Brands **2N, Grandstream+**
- Events **Door/Card/Tamper**
- Auth **Native SIP**

SQL Database (ODBC)

Direct polling of MSSQL, MySQL, PostgreSQL via ODBC. Ideal for Honeywell WIN-PAK and legacy systems without REST API.

- Sources **MSSQL/MySQL/PG**
- Presets **Included**
- Custom SQL **Supported**
- Pagination **Auto**

MQTT Output

Publish to MQTT brokers in parallel with VMS. Custom topics, QoS levels, TLS encryption.

- QoS **0, 1, 2**
- TLS **Supported**
- Topics **Template-based**
- Payload **Customizable**

SIA DC-09 Receiver

Inbound alarm panels — Honeywell, DSC, Bosch, Ajax, Texecom, Paradox. AES encryption.

- Encryption **AES-128/192/256**
- Accounts **Multiple**
- Brands **8+ supported**
- Delivery **Real-time push**

LenelS2 OnGuard

Enterprise ACS via OpenAccess REST API. Card swipes, access granted/denied, door events.

- Versions **7.x – 8.x**
- Auth **OpenAccess**
- Events **Swipe/Grant/Deny**
- Cloud **Supported**

COMPATIBLE SYSTEMS

LenelS2	ZKTeco	Hikvision	Dahua	SIP Intercoms
OnGuard 7.x–8.x OpenAccess API	BioTime 9.x Card · FP · Face	ISAPI Devices NVR · DVR · ACS	ASI Series CGI · Digest Auth	2N, Grandstream Doorbird, Aiphone
